

# Diamond Wine Rack

**Instructions to Construct a Diamond Wine Rack**

**Thank you for purchasing this Australian Designed Wine Rack**

**See install instruction and always secure your wine rack to the wall**

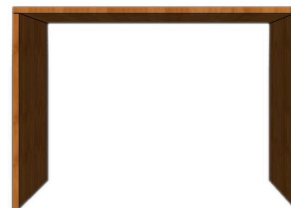

Vertical Timbers x 2	Horizontal Timber x 2	Angled Timbers x 2	Wall Brackets x 2	Fixing Screws
----------------------	-----------------------	--------------------	-------------------	---------------

Tools required - Hand screw driver only. (wood will split with too much force from power drills)

---

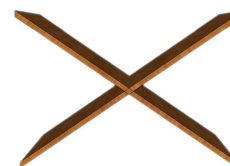

1.) Arrange a single Horizontal timber piece on top of 2 Vertical timber pieces.

- Countersunk screw holes side up,
- Curved edges of timber to front.
- Screw into pre drilled holes to flush finish.

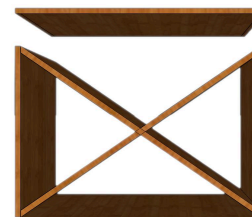

2.) Slot the Angled timbers into each other forming a X

- Turn the assembled Box up.
- Place the X inside the open built box.

2.) Place remaining Horizontal timber on to form the box.

- Countersunk screw holes side up,
- Curved edges of timber to front.
- Screw into pre drilled holes to flush finish.

Thank you for purchasing this Diamond Wine Rack  
Always secure your wine rack to the wall.
